

NOTE – Selective Use of AI:

The use of generative AI tools is permitted only for specific components of this assessment, as indicated in the assignment instructions. Students must not use AI for other features. Any permitted use of generative AI must be appropriately acknowledged.

Submission instructions

1. Write a README file for detailed notes regarding the functionality of the corresponding code and a set of instructions on how to run them.
2. Demonstration of a solution is also required for evaluation. Each member must demo his/her work only. It is your responsibility to ensure your software works in the lab PC and it is ready for demo without bugs/errors. Other instructions will be given later.
3. Completely fill Mark Allocation Sheet and submit with your assignment. Failing to do so may result in a deduction of 50% marks.
4. This assignment must be submitted in a groups of 2 or 3 members. Assign a group leader and submit the assignment through the group leader's moodle account. You have to submit just one zipped file of your project. The submission filename should read A2_Sxxx_Syyy_Szzz.zip or A2_Sxxx_Syyy_Szzz.rar where Sxxx, Syyy and Szzz are student ids of the group members. For example A2_S11003232_S01004488.zip or A2_S11003232_S01004488_S11015566.zip.
Incorrect/late submission will result in a high penalty.
5. Marks are allocated for standard programming, your creativity, ease of use and demonstrating an error-free application.

Mark Allocation Sheet

After having discussed as a group, we recommend the following mark allocation to each group member based on contribution or lack of it throughout the assignment.

Group Name **Omega**

Project manager **Abraham**

Certification			
Member ID	Percentage contribution	Member name	Signature
S11213863	100% Part 1+ Part2	Abraham Tagi	<i>Abraham</i>
S11231252	100% Part 2 + Part3	Jeremaia	<i>Jeremaia</i>
S11217086	100% Part 3 + Part 4	Afrete Robin	<i>Afrete</i>

Due Date – please refer to Moodle.
